

Oil & Gas Processing

Drilling for natural gas and oil in the northern states will grow inexorably over the next few decades, and it is vital that the equipment used is reliable. S. Howes equipment and closed loop systems can provide solids recovery. New environmental regulations imposed by state environment protection agencies now address the disposal of drilling fluids. These new regulations can significantly add to an energy company's drilling budget. Southern states have begun adopting similar regulations as an alternative to the open-pit disposal approach for drill tailings.

Industrial Process Equipment

- Mixers
- Screw Conveyors
- Separators & Screeners

Mixing

S. Howes' mixers have robust and heavy-duty construction and are built with proven designs to deliver superior, uniform mixing and blending. Batch, continuous, ribbon, paddle and custom agitator mixing designs are available for your oil and gas processing needs.

Jacketed Processing Mixer

Thermal Mixer

Vaccum & Drying

Screw Conveying

Save space with screw conveyors to move drilling cuttings, petroleum and oil sludge. Options include heating and cooling, feeding, and u-trough, split-tube, or tubular designs.

U-Trough Conveyor

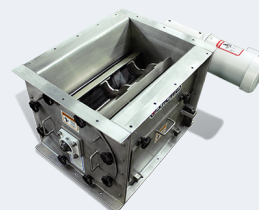

Tubular

Separating & Screening

Custom screening, sifting and separating systems to meet specific processing requirements.
